

# Radio Remote Control - Underground Mining Equipment

**Higher Productivity, Higher Safety!**

## Background Information:

Due to the hazardous working face, mining operation cannot avoid two problems:

- Low Productivity
- Operator's Safety

**That's all relative to mining profit!**

Radio Remote Control solutions for mining equipment can solve above two important problems in mining operation.

Over years of experience on innovative solutions of mining processing, **Alpha can customize any machine into Remote Control.**

## Advantages:

- **Keep operators away from hazardous environment**
- **Optimize mining site productivity**
- **Low maintenance cost**
- **Customization supported**
- **Easy to update**
